

# Universal Bushing Adapter

- o Versatile & Cost Effective
- o Adapts RG 58 Cable clamp to .141 Semi Rigid Cable and .085 Semi Rigid Cable.
- o Adapts RG 214 Cable clamp to 1/4" diameter RG-401 Cable.
- o Fits most UG Style Connectors
- o Useable to 4 GHz

The ASI bushing adapters convert most UG style clamp connectors from RG 58 and RG 213 cable group to a solder-clamp RG 401 (0.25 dia. Semi-Rigid), RG 402 (0.141 dia. Semi-Rigid) or RG 405 (.085 dia. Semi-Rigid).

This bushing adapter solders to the jacket of the semi-rigid cable and replaces the braid clamp in the standard connector. The Vee groove gasket, slip washer, and clamp nut of the standard

connector are used to provide a versatile, weather resistant connection.

The ASI bushing adapter provides a strong mechanical joint to the connector with almost no increase in overall length. When using bulkhead connectors, this bushing yields a neat, cost effective adjustable connection. The bushing is bright tin plated brass, or gold plated brass for good solderability.

Adapts		Price ea.		
From	To	ASI Part No.	1-99 qty	100 qty
RG 402 (.141 dia.)	RG 58 UG Clamp	6-00031-01-B00	2.10	1.61
RG 401 (.250 dia.)	RG 213 UG Clamp	6-00050-01B00	4.85	3.25
RG 405 (.085 dia.)	RG 58 UG Clamp	6-00094-01B00	3.08	2.60
